# X-BOLT 120 10

* Non-binding image

DESCRIPTION / GEOMETRY

Reliability, autonomy and an enviable aesthetic to enjoy your weekend adventures. If you think about technology and performance, if you think about expanding your horizons without complexes... this is, without a doubt, your best option.

An advanced **G2** carbon frame with intermediate module and internal battery, an efficient 120 mm suspension design and the potential of the fourth generation Bosch drive system make this bike a benchmark in the ebike segment. The 29" wheels together with the agility and lightness provided by its innovative chassis will allow you to devour kilometers and kilometers without any worries.

If you think of a balanced geometry, if you think of a fast, fun and stable bike... you are thinking of **X-BOLT 120**.
